

MILIOT SCIENCE

BORN IN FINLAND

The very best tools for your RNA, DNA and Protein work

Miliot Science is a company formed by scientists for scientists. Our aim is to bring the very best tools for an unique price to scientists in all Nordic countries. We have chosen **NorgenBiotek**, since they have a totally unique affinity matrix which binds to RNA, DNA and Proteins with a higher affinity than any other resin in a commercial kit. This enables enrichment from degraded samples, complex samples and even single cells. For your routine small instrumentations we have chosen **ELMI**, since here we find that the products are in a league of their own when it comes to the price/quality ratio.

All prices are tax free euro prices from our warehouse as of 31.5.2015, please confirm current prices before ordering.
