

MILIOT SCIENCE

BORN IN FINLAND

End of year 2019 laboratory news and offers!

Miliot Science has just begun its 10th fiscal year. Our cooperation partner Radwag has successfully supported us on this journey from the very start. In order to celebrate this we will offer **all Radwag X2 series analytical and precision balances as well as moisture analyzers with 10% discount**. You do not want to miss out on this opportunity! Please have a look on the **Radwag X2 balance series [brochure!](#)**

Check out the whole range of discounted balances and moisture analyzers here:

[AS.X2 series analytical balances](#) ♦ [PS.X2 series precision balances](#) ♦ [WLC.X2 series precision balances](#) ♦ [MA.X2.IC.A series moisture analyzers](#) ♦ [MA.X2.A series moisture analyzers](#)

Some key features of Radwag X2 series balances includes:

- automatic internal adjustment *(not in all WLC.X2 or MA.X2.A models)
- autotest diagnostic function to check actual environmental conditions and to optimize balance for weighing in such conditions
- large 5" colour touch screen, programmable
- very versatile weighing programs and databases, fully compliant with GLP and GMP requirements, large internal alibi memory
- 2 programmable IR sensors e.g. for touch-free weighing
- WiFi, ethernet, USB, RS232

→ Please contact us for price and other information. We are here to help you make the right decision!

MPW high quality M-series centrifuges to special campaign price!
(prices without rotor, choose the correct rotors for your needs and inquire our package price)

MPW M-SCIENCE centrifuge price 1295,- €

- max speed 18 000 rpm, max RCF 24270 x g
- volume 100ml, max tube size 10ml
- large range of angle rotors

MPW M-DIAGNOSTIC centrifuge price 1495,- €

- max speed 6 000 rpm, max RCF 4830 x g
- volume 500ml, max tube size 100ml
- large selection of both angle and swing-out rotors

MPW M-UNIVERSAL centrifuge price 1595,- €

- max speed 18 000 rpm, max RCF 24270 x g
- volume 500ml, max tube size 100ml
- over 30 rotors, both angle and swing-out rotors

[specifications](#)

Some key features in all MPW M-series centrifuges includes:

- large graphic LCD display • 100 program memory • 10 acceleration/deceleration profiles • low noise • maintenance-free induction motor • unbalance sensor • RPM/RCF adjustment • timer • automatic rotor identification • conforms with security standards •

→ Ask for other centrifuge options, we have complete selection of MPW and Elmi centrifuges

POL-EKO ILP 53 SMART cooled incubator

When the correct temperature matters, *price 2595,- €.*

Innovative and ecological incubator with cooling system based on the **Peltier cell technology**

Advantages over compressor-cooled incubators:

- Environmentally friendly – no need for refrigerants
- Lighter and smaller units
- Free from compressor generated vibrations and noise
- Perfect temperature stability and uniformity as well as improved temperature recovery time

ILP 53 SMART – volume 56L, forced air convection, 0...+70°C, 0.1°C resolution, double doors (window on internal door), new SMART 4.3" colour touch screen, versatile programming possibility, internal memory, USB and LAN ports, alarm system

[specifications](#)

[SMART specifications](#)

→ We have the complete range of **Pol-Eko** solutions for heating and cooling!

- **Corning-HTL Discovery Pro pipettes**, price 195,- €/pcs or 549,- €/3pcs ergonomic single channel pipettes with variable volume (0.1-2, 0.5-10, 2-20, 10-100, 20-200 and 100-1000 µL), compatible with most tips on the market [specifications](#)
- **Elmi DRS-12 rocking shaker**, price 795,- €. for long lasting mixing, adjustable rocking angle 1-12 degrees and speed 1-50 rpm, programmable rocking profiles, timer and internal memory, strong universal magnetic clips included (option antislip mat) [specifications](#)
- **Hanna Instruments HI-181 magnetic stirrer**, price 165,- €. small compact magnetic stirrer with Speedsafe function, max 1L, 100-1000rpm, **integrated 3-place electrode holder** with adjustable arm, 11 different colour options [specifications](#)
- **Hanna Instruments HI-991001 portable pH/°C meter**, price 465,- €. new modern design, shockproof and waterproof IP67, lightweight, designed specifically for manufacturing and environmental testing protocols, pH-electrode with titanium body, integrated temperature sensor, 1m cable, multilevel LCD display, pH-range -2.00 - +16.00 [specifications](#)
- **Optika CL-41 X-LED³ illuminator** with brightness control, price 295,- €. double flexible 60cm arm with very powerful 3.6W X-LED³ in each arm, pure white light, 6300 K, 400 lumen and up to 170 000 lux illuminance [specifications](#)
- **Optika B-69 brightfield educational microscope**, price 299,- €. ideal to start exploring microscopy, binocular 360° rotating, cordless, slim and easy to carry, 1000x (achromatic objectives 4x, 10x, 40x and 100x), reversed nosepiece, mechanical StagErase™ stage, 1W LED with brightness control, rechargeable batteries, arm/wrist rest support [specifications](#)

OFFERS VALID UNTIL 31.12 2019 !

Enquiries and orders can be e-mailed directly to: miliot@miliot.com

Please remember to read our [Sales terms](#)

Our complete product portfolio can be found here: [Our portfolio](#)
please also have a look at our other current offers here: [Super offers](#)

Note! During our 10th fiscal year we will diligently update our product range in our web shop as well as our Super offers. Please be sure to visit www.miliot.com frequently!

Miliot Science wishes You all a successful end of 2019!
